

# TTTriddles

## Previous (PiN'CHAS) TTriddles:

### [1] FPTL: King Solomon was king over all of Israel

Melachim Alef 4:1 - VAYHI HAMELECH SH'LOMO MELECH AL KOL YISRAEL.

$6+10+5+10$  (31) +  $5+40+30+20$  (95) +  $300+30+40+5$  (375) +  $40+30+20$  (90) +  $70+30$  (100) +  $20+30$  (50) +  $10+300+200+1+30$  (541) = 1282.

### [2] Pinchas = Eliyahu

• Pinchas = Eliyahu + Yosef

The Midrash (Yalkut Shimoni, among others) says that Pinchas was Eliyahu. Both were KANA'IM... That's the first equation.

The second equation is based on Gimatriya.

$PINCHAS = 80+10+50+8+60 = 208$

$ELIYAHU = 1+30+10+5+6 = 52$

$YOSEF = 10+6+60+80 = 156$

$208 = 52+156$ , so Pinchas = Eliyahu + Yosef.

Take a look at this:

$1 \times 52 =$  Eliyahu, Kalev, Avital (one of David's wives)

$2 \times 52 = 104 =$  Nachum, Mano'ach

$3 \times 52 = 156 =$  Yosef, Yechezkeil, Vofsi, M'muchan

$4 \times 52 = 208 =$  Yitzchak, Pinchas, Hagar

### [3] MazalPic

The Zodiac sign for Av - or, as we would say - the mazal of Av, is Leo, the Lion. ARYEI, in Hebrew. Within the constellation Leo, is a prominent asterism (a group of stars - can be part of a constellation or it can be part of two constellations), called the Sickle. That is what the MazalPic is.

### [4] The TTriddle that wasn't

Actually, it was! At the very bottom of page 69 in the Pinchas issue (1282), there was a TTriddle which was only being stored at the bottom of that page and was supposed to find a regular TTriddle location. House in the Mouth. House is a bayit, here the letter BET. Mouth is a peh, here the letter PEI. Look at the PEI in the sedra box.
